

PARASITOLOGY

CONTENTS

- PREFACE: Chaperoning parasitism: the importance of molecular chaperones in pathogen virulence**
Utpal Tatu and Len Neckers 1123
- Progress and prospects for targeting Hsp90 to treat fungal infections**
Amanda Veri and Leah E. Cowen 1127
- Toxoplasma gondii* Hsp90: potential roles in essential cellular processes of the parasite**
Sergio O. Angel, Maria J. Figueras, Maria L. Alomar, Pablo C. Echeverria and Bin Deng 1138
- Heat shock protein 90 as a potential drug target against surra**
Ankit K. Rochani, Chandan Mithra, Meetali Singh and Utpal Tatu 1148
- No stress – Hsp90 and signal transduction in *Leishmania***
A. Hombach and J. Clos 1156
- Plasmodial Hsp40 and Hsp70 chaperones: current and future perspectives**
E.-R. Pesce and G. L. Blatch 1167
- Co-chaperones of Hsp90 in *Plasmodium falciparum* and their concerted roles in cellular regulation**
Chun-Song Chua, Huiyu Low and Tiow-Suan Sim 1177
- Hsp90: a chaperone for HIV-1**
Jun Siong Low and Ariberto Fassati 1192
- Nematode Hsp90: highly conserved but functionally diverse**
Victoria Gillan and Eileen Devaney 1203
- Mouse studies on inhibitors of *Plasmodium falciparum* Hsp90: progress and challenges**
Abebe Genetu Bayih and Dylan R. Pillai 1216
