SPECIAL ISSUE REVIEWS

Human infection with *Strongyloides stercoralis* and other related *Strongyloides* species

Thomas B. Nutman

263

Strongyloides spp. infections of veterinary importance

Stig M. Thamsborg, Jennifer Ketzis, Yoichiro Horii and

Jacqueline B. Matthews

274

Strongyloides ratti and *S. venezuelensis* – rodent models of *Strongyloides* infection

Mark Viney and Taisei Kikuchi

285

Strongyloides infection in rodents: immune response and immune regulation

Minka Breloer and David Abraham

295

Genetics: modes of reproduction and genetic analysis

Adrian Streit

316

Transgenesis in *Strongyloides* and related parasitic nematodes: historical perspectives, current functional genomic applications and progress towards gene disruption and editing

J. B. Lok, H. Shao, H. C. Massey Jr. and X. Li

327

The genome of *Strongyloides* spp. gives insights into protein families with a putative role in nematode parasitism

Vicky L. Hunt, Isheng J. Tsai, Murray E. Selkirk and Mark Viney

343
