Special Report

The Challenge of Measuring Sweet Taste in Food Ingredients and Products for Regulatory Compliance: A Scientific Opinion

Dustin E. Starkey, Zhuzhu Wang, Kommer Brunt, Lise Dreyfuss, Philip A. Haselberger, Stephen E. Holroyd, Kaushik Janakiraman, Prabhakar Kasturi, Erik J.M. Konings, David Labbe, Marie E. Latulippe, Xavier Lavigne, Barry V. McCleary, Salvatore Parisi, Tony Shao, Darryl Sullivan, Marina Torres, Sudhakar Yadlapalli, and Ioannis Vrasidas 333

Animal Food, Pet Food, and Plant Nutrient Methods

Establishment of a Chemiluminescence Immunoassay Combined with Immunomagnetic Beads for Rapid Analysis of Ochratoxin A

Bo Zhang, Wenting Liu, Zhenjiang Liu, Xiaoling Fu, and Daolin Du 346

Drug Formulations

Determination of Sulphasalazine and Its Related Compounds by Simple, Smart, Validated, Green Spectrophotometric Methods

Nada S. Abdelwhab, Neven M. Habib, Maha M. Abdelrahman, Hamada M. Mahmoud, and Aml A. Emam 352

HPLC-MS Analysis of Four Potential Genotoxic Impurities in Alogliptin Pharmaceutical Materials

Bashar Al-Sabti and Jehad Harbali 362

QbD-Based Development and Validation of Novel Stability-Indicating Method for the Assay and Dissolution of Garenoxacin in Garenoxacin Tablets

Ajitha Azhakesan and Sujatha Kuppusamy 370

Greenness Assessment of Two Validated Stability-Indicating Chromatographic Methods for Estimating Modafinil Using the Analytical Eco-Scale

Soha G. Elsheikh, Abeer M. E. Hassan, Yasmin M. Fayez, and Sally S. El-Mosallamy 379

Validated Spectrophotometric Methods for Simultaneous Determination of Atorvastatin Calcium and Olmesartan Medoxomil in Their Pharmaceutical Formulation

Amira H. Kamal, Sherin F. Hammad, and Aya A. Marie 387

Environmental Chemical Contaminants

Analysis of Fragrance Allergens in Personal Care Products, Toys, and Water Samples: A Review

Jing Chen, Zonghui Yi, Rui Sun, Wei Ning, Chen Zhou, Ziyi Tian, Chengjun Sun, and Yongxin Li 396

Food Chemical Contaminants

A Complementary, Quantitative, and Confirmatory Method to UHPLC/ESI Q-Orbitrap Screening Based on UPHLC/ESI-MS/MS for Analysis of 416 Pesticides in Fruits and Vegetables

Willis Chow, Daniel Leung, and Jian Wang 413

Development and Interlaboratory Evaluation of an LC-MS/MS Method for the Quantification of Lysozyme in Wine Across Independent Instrument Platforms

Melanie L. Downs, Beth Anne McClure, Shyamali Jayasena, Bini Ramachandran, Michael Krawitzky, Tony Ribeiro, Julie Wallace, Steve Tallman, and Bill Mortola 433

Determination of Gliadin as a Measure of Gluten in Food by R5 Sandwich ELISA RIDASCREEN® Gliadin Matrix Extension: Collaborative Study 2012.01 Markus Lacorn, Tina Dubois, Thomas Weiss, Lisa Zimmermann, Teresa-Maria Schinabeck, Simone Loos-Theisen, and Katharina Scherf	442
An Overview of Analytical Methods for the Quantification of Marbofloxacin in Pharmaceutical, Biological, and Food Matrixes Thayanara Lorrane Alves da Silva, Raissa Gabrielle Lima Ferreira, Isadora Alves Lustosa, and Ana Carolina Kogawa	456
Selecting Processing Robust Markers Using High-Resolution Mass Spectrometry for the Detection of Milk in Food Products Kaatje Van Vlierberghe, Maxime Gavage, Marc Dieu, Patsy Renard, Thierry Arnould, Nathalie Gillard, Kathleen Coudijzer, Marc de Loose, Kris Gevaert, and Christof Van Poucke	463
Human Nutrient Methods Applicability of a General Analytical Approach for Detection of Genetically Modified Organisms: Collaborative Trial Chenguang Wang, Chunmeng Huang, Pengyu Zhu, Zhixin Du, Shuang Wei, and Wei Fu	476
Microbiological Methods Validation of Modifications to the Seleris® E. coli Method for Detection and Threshold Determination of Escherichia coli in Select Foods: Level 3 Modification to AOAC Performance Tested Method SM 101101 Nancy Beck, Quynh-Nhi Le, Mark Mozola, Brooke Roman, Carolyn Montei, Lei Zhang, Preetha Biswas, and Robert Donofrio	483
Validation of the Thermo Scientific™ SureTect™ Staphylococcus aureus PCR Assay for the Detection of Staphylococcus aureus in Dairy Matrixes: AOAC Performance Tested Method SM 052101 Katharine Evans, Nikki Faulds, David Crabtree, Annette Hughes, Daniele Sohier, Craig Manthe, Matthew Hahs, Pauliina Heikkinen, Emmi Hurskainen, Kateland Koch, Wesley Thompson, Benjamin Bastin, and M. Joseph Benzinger Jr	492
Validation of the Thermo Scientific SureTect™ Campylobacter jejuni, C. coli, and C. lari PCR Kit for the Detection of Campylobacter jejuni, C. coli, and C. lari in Raw Poultry and Ready-to-Cook Poultry Products: AOAC Performance Tested Method SM 012101 Nikki Faulds, Katharine Evans, Jessica Williams, David Crabtree, Annette Hughes, Patrick Stephenson, Dean Leak, Daniele Sohier, Jukka-Pekka Palomäki, Benjamin Bastin, M. Joseph Benzinger Jr, and James Agin	506
Validation of the Thermo Scientific SureTect™ Escherichia coli O157:H7 and STEC Screening PCR Assay and SureTect™ Escherichia coli STEC Identification PCR Assay for the Detection of Escherichia coli O157:H7 and the Escherichia coli STEC Serotypes (O26, O45, O103, O111, O121, O145) from Fresh Raw Spinach, Fresh Baby Leaves, Fresh Cut Tomatoes, Frozen Raw Beef, Raw Beef Trim, and Beef Carcass Sponges: AOAC Performance Tested Method SM 012102 Nikki Faulds, Katharine Evans, Jessica Williams, Ana-Maria Leonte, David Crabtree, Katherine Church, Dean Leak, Daniele Sohier, Jukka-Pekka Palomäki, Pauliina Heikkinen, Craig Manthe, Kateland Koch, Benjamin Bastin, M. Joseph Benzinger Jr, and James Agin	521
Validation of the MYChrOme™ Culture Plate for Detection and Differentiation of Rapid-Growing Nontuberculous Mycobacteria in Potable and Non-Potable Water: AOAC Performance Tested Method SM 062101 Katherine E. Fisher, Avneet K. Chhabra, Leah P. Wickenberg, and William F. McCoy	549

Natural Products

- Establishment and Development of a Quality Evaluation Method for Sangbaipi Decoction
Huiwei Bao, Huailei Yang, Jize Li, Yang Xu, and Xiaowei Huang 558
- Study on Sialic Acid Binding State in Stewed Bird's Nest and Optimization of Enzymatic Extraction of Free and Oligosaccharide-Bound Sialic Acid
Yuwei Dai, Jie Cao, Yu Zhang, Feng He, and Lin Jiang 567
- Comparison of Volatile Oils and Primary Metabolites of Raw and Honey-Processed Ephedrae Herba by GC-MS and Chemometrics
Mei Guo, Zhicong Wu, Qi An, Hengyang Li, Lei Wang, Yuguang Zheng, Long Guo, and Dan Zhang 576
- Determination of Illegally Used Chemical Dyes in the Chinese Herbal Medicine "Red Flower Oil"
Yi He, Jing Lu, Fengyan He, Yumei Zhang, Feifei Wang, Jingjing Liu, Xiaowei Zheng, Zhong Dai, and Shuangcheng Ma 587
- Micronization of Thebaine Extracted from *Papaver bracteatum* Lindl. Using Supercritical Fluid Technology
Hamze Salehi, Mehrnaz Karimi, and Farhad Raofie 593
- Study of the Unique Characteristics of Multi-Elements of the Wild Astragali Radix from Shanxi Province by Inductively Coupled Plasma Mass Spectrometry
Junjie Zhang, Youming Lin, Xuehong Wei, Zhenyu Li, and Rongrong Li 603
- Statistical Analysis and Chemometric Methods**
- Three Smart and Original Spectrophotometric Data Processing Ratio Techniques for Resolving the Partial Overlapped Spectra of the Binary Antiviral Mixture Daclatasvir/Sofosbuvir: Application to Combined Dosage Form Darvoni® Tablets
Ahmed S. Fayed, Maha A. Hegazy, Ebraam B. Kamel, and Maya S. Eissa 612
- Mathematical Modeling for HPLC Separation and Quantification of an Anti hypertensive Combination by Response Surface Methodology
Ahmed M. Hemdan 623
- Adoption of Advanced Chemometric Methods for Determination of Pyridoxine HCl, Cyclizine HCl, and Meclizine HCl in the Presence of Related Impurities: A Comparative Study
Ahmed S. Saad, Mohammed E. Draz, Ibrahim A. Naguib, Hala E. Zaazaa, Adel S. Lashien, and Fatma F. Abdallah 630
- On the Estimation of POD and LOD of Qualitative Microbiological Assays from a Multi-Laboratory Validation Study
Shizhen S. Wang and John Ihrie 641
